

PPI to us: in song

We've got something to offer.
We've got experience.
We need to get involved.
We can't leave it up to chance.
It's all about collaboration.
The benefits are clear.
PPI is good for all.
The time for change is here.

We come from different places,
different walks of life.
We'd like to see a change in the world;
to put a few things right.
We see that the world of research
needs a helping hand.
We want every voice to be heard;
every child every woman and man.

Chorus

*Public patient involvement;
that's the way to go!
The patient is part of the answer;
let everybody know.
Don't leave us in the wilderness.
Don't shut us out in the cold.
We have so much to offer.
PPI is the way to go.*

We all sit down together.
We share our knowledge pool.
Our children want a future.
It's up to me and you.
Compassion is the key to help us understand.
What's good for you is good for me.
We all can lend a hand.

Chorus
